

DMIT Webserver – dmitstudent.ca

NOTE: THIS ACCOUNT IS ONLY FOR NAIT SCHOOLWORK. PLEASE DO NOT USE IT FOR HOSTING FILES THAT ARE NOT RELATED TO YOUR LESSONS. ANY ABUSE OF THIS ACCOUNT WILL RESULT IN THE ACCOUNT BEING SUSPENDED.

Account Information

Login: username (your NAIT username).

Temporary Password: student ID number.

Admin Panel: <https://studentweb2.sicet.ca:10000/>

URL: <http://username.dmitstudent.ca>

****Day 1** - Login to your Admin Panel to change your password:

Login using temporary password >> Server Configuration >> Change Password

This will change both the Admin Panel and the default FTP passwords. When creating a new password use a password manager to save/store the new password. Your instructor will not be able to recover your password if you forget it.

Note: Admin Panel security alert (browser): Do not worry about this. Just click Advanced, then Continue (Google Chrome), and go about your business. The browser based security alert is because the panel is using SSL (https:// instead of http://), but a certificate has not be purchased for this domain.

FTP:

Host: dmitstudent.ca

Protocol: FTP

Username/password: same as default login

***** **Directory for web files:** public_html *****

Open FileZilla on your machine. If you don't have the program it can be downloaded free of charge from their website. Please ensure that you install the client only. We'll create and save a new connection using FileZilla's "Site Manager", that way we won't have to enter all of the FTP credentials every time we wish to connect.

1. On the File drop down menu select "Site Manager".
2. Press the New Site button at the bottom of the left side and name it "Student-web". Note: This will be done the first time you create the site. When you next connect you need only select the site name you created from the select entry navigation side.
3. On the "General tab",
 - a. For Host: "dmitstudent.ca"
 - b. For Protocol: "FTP – File Transfer Protocol"
 - c. For Encryption, "Use explicit FTP over TLS if available"
 - d. Logon Type: "Ask for password"
 - e. User: your Nait student account

Press the Connect button and input your NAIT student password when prompted.
